TEXAS ALLOYS FOR TEXAS INDUSTRY

Texas’ own production of Ferromanganese and Ferrosilicon is rolling out of the new modern TENN-TEX plant in Houston. These important alloys are available in lump or other forms for shipment to Texas foundries and steel plants, to improve metal properties and insure quality castings.

On your next requirement for Ferro Alloys, try TENN-TEX for faster service and top quality.

THE LITTLE PINE THAT MADE GOOD

Only a few years ago, a stunted pine in Texas' forests was likely to be destroyed as a wasted effort of nature. Today, such a pine furnishes the raw material for one of the state's newest, most valued industries — pulp and paper.

Champion is proud to be a Texas pioneer in this industry that creates new wealth from "little pines that made good."

HOUSTON PORT BOOK, SPRING, 1954
Rain may spoil a day of fun for the youngsters, but it never spoils a wash day for the lucky lady with an automatic gas clothes dryer... an appliance that's made-to-order for natural gas. It's easy to buy, easy to install, inexpensive to operate and much, much faster than other types of dryers.

Gas is the preferred fuel in homes and industries alike here in the Gulf South. And natural gas producers invest millions of dollars every year in the search for more gas for you. It is in your interest that these producers be encouraged, through freedom from needless regulation and in every other way, to continue that search.

Budget-wise families agree that natural gas service is the biggest bargain in the home today — worth every cent they pay for it... and then some!
Rocket Freights...  
and the  
Port of Houston  
—a shipping combination of interest  
to exporters and importers

The entente cordiale that has long existed between the Rock Island Lines and the Port of Houston is reflected in the smooth and efficient flow of products from train to ship and ship to train.

ROCKET FREIGHTS play a major role in this cooperative effort. Designed to do a colossal job of transporting products and materials of every description, these diesel-powered, smooth rolling trains move on fast schedules and with clock-like regularity.

As a link in global transportation ROCKET FREIGHTS have earned a reputation for dependability and on-time performance.

SP “deals in futures” with development dollars

Dollars Southern Pacific invests in new equipment, plant improvements, industrial sites, are development dollars—dollars spent to improve and expand service to the community. Such development dollars help to build communities . . . to broaden markets . . . to insure the future.

One of many new projects in Houston is an ultra-modern gravity switching yard. This new "push-button" yard will cover 300 acres and cost about 6 million dollars. This money is invested by SP not only to meet the needs of the present, but to keep pace with the future demands of this rapidly expanding area.

If you plan to expand into the Golden Empire, write:

Produced In A Full Range Of AISI Grades To Meet Virtually All Manufacturing Requirements

Tonnage-wise, Sheffield's steel producing capacity has been stepped up many times.

So has the range of grades in which Sheffield steels are made. These include the full range of standard AISI alloy steels. It is estimated that these meet up to 95% of requirements of manufacturers in the heavy hard goods field.

New annealing and heat treating facilities further widen the levels of strength, or hardness in which Sheffield alloy steels are supplied. Also the range of shapes and sizes is constantly being broadened for more varied engineering application.

In order to insure that their chemical and physical ranges fall within close limits, Sheffield alloys are electronically checked with a direct reading quantometer. It is capable of simultaneously determining the quantities of eight different alloy elements in a matter of minutes.

Pictured above are some of the products which manufacturers make from Sheffield alloy steel. Sheffield offers to all manufacturers, engineering and research organizations the services of its metallurgical and engineering staff in developing steels to fit individual and particular requirements.

Write or call your nearest mill or district sales office if you have steel problems involving strength, hardness and corrosion or abrasive resistance which alloys impart.
from shore to ship...

Shell Oil Company is prepared to supply ships in the port of Houston with three of the finest marine fuels available. They are SHELL BUNKER FUEL OIL, and SHELL LIGHT and HEAVY MARINE DIESEL FUELS; all made right here at Shell's Houston Refinery. DEVELOPED BY SHELL RESEARCH AND BACKED BY YEARS OF PROVEN PERFORMANCE, THESE SUPERIOR FUELS ARE AVAILABLE BY CALLING OR WRITING.

Essomarine Lubricants

in the Port of Houston are supplied by Humble Oil & Refining Company. These world-wide favorites of marine engineers are available in drums or in bulk at the Houston Turning Basin; truck deliveries can be arranged wherever a ship is berthed.

HUMBLE OIL & REFINING COMPANY

Essomarine lubricants include a complete line of lubricating oils and greases for every type of turbine, diesel and reciprocating engine on the Seven Seas.
As a consumer of cotton products, you may buy your cotton at a grocer's, a druggist's, a department store, or a service station.

Through his sensitive fingertips is transmitted the ebb and flow of consumer demand. His word . . . “Housewives are using more margarine . . . cotton broadloom carpeting is the choice of decorators . . . designers prefer cotton for evening wear . . .” is the signal that starts hundreds of looms and activates a score of crushing mills. And as the industry’s “front line” cotton man, his appraisal of world demand helps guide farmers in planting the world’s most useful, most versatile crop — cotton.

HAVE YOU SEEN THE

NEW Pulse?

From cover to cover PULSE OF TEXAS is completely new:
It’s bigger... it has an entirely new format that includes
more articles, more pictures, more information about the
Coastal Corridor.*

It contains case histories of industries that have come to
the Corridor, special features about—but, read for yourself
the contents of the current issue:

Why Monsanto came to Texas—and stayed
Dow likes it in Texas
Texas grew in 1953
News along the Coastal Corridor

You’ll find the new PULSE more interesting than ever.
If you aren’t on the mailing list, a request will bring you
PULSE regularly.
