about Texas alloys

Match your specifications

TENNESSEE'S line of ferro-alloys includes a wide variety of analyses, grades, and sizes to meet your exacting specifications. Ferrosilicon, ferromanganese and silicomanganese alloys are available in large, clean lumps, or in finely crushed and screened sizes for adding in the furnace or the ladle. Shipped in bulk . . . in 250 and 500 lb. drums . . . or in one-ton pallets.

TENNESSEE also produces low phosphorous pig iron, high grade malleable pig iron (made to individual specifications), Radiant foundry coke, and Tenn-Sil sand additive. Write Dept. S-5 for further information.

How Correct Lubrication Puts Money in Your Pocket

We’re not talking about top-quality industrial lubricants alone. You can buy those from many companies. Correct lubrication is planned specifically for your kind of machinery, under actual operating conditions. Working with your personnel, our industrial engineers analyze your machines . . . recommend the correct Mobil lubricant for every moving part . . . demonstrate correct methods of application and set up a regular lubrication schedule for your plant. Result? More continuous operation; protection against loss of power with savings in fuel costs; minimum maintenance costs and maximum equipment life . . . a more profitable operation.

Twelve 195-foot covered cargo barges developed by Dravo and A. L. Mechling Barge Lines, Inc. are providing the first "through" cargo service between Florida and the Midwest. By eliminating handling and warehousing expenses as well as lost time, this operation is increasing the movement of many bulk commodities.

"Dual-purpose" barges to develop new commerce are typical of the many improvements Dravo has made in floating equipment since 1915. For details on design and construction features that can add new profits to your operations, contact the nearest Dravo office.

**FEATURES**

- River or short coastwise service
- Easy loading and unloading
- 1350 net ton capacity
- Watertight rolling hatch covers
- Minimum towing resistance
- Stability for off-shore towing
- Semi-integrated for added capacity
... as corrosive as hydrochloric acid
... as critical as caustic soda
... as volatile as chloroform
as viscous as molasses

problem liquids are stored safely in General American tank storage terminals

Easy-to-handle liquids and problem liquids alike ... they're all in a day's work for the men at General American terminals. Storage capacity of over half-a-billion gallons is available for any liquid that can flow through a pipeline.

Facilities are also available for blending to your specification ... for drumming, barreling and canning to meet your needs. You get the privacy, service, safety and flexibility of your own terminals without capital investment.

By maintaining liquid inventories at General American terminals, you can fill rush orders for your customers or meet your own needs quickly, efficiently and economically.

It Pays To Plan With General American

Terminals located at:
Port of New York (Carteret, N. J.)
Port of New Orleans (Good Hope, La.)
Chicago, Illinois (Bedford Park)
Port of Houston (Galena Park and Pasadena, Texas)
Corpus Christi, Texas

As we move into another Perfect Shipping month, we look back over the past year to check our progress. Happily, we've taken another big forward step. There's been more careful handling, more efficient storage, better packaging, less freight loss, fewer damages. This progress would have been impossible were it not for the cooperation shippers have given us. So a hearty thanks to all of you! Let us remember, too, the wisdom contained in Michelangelo's words. For it is indeed the little things that count—done right they lead to perfection.

A big part of every Rock Island representative's job is to work with shippers. If you haven't tried Rock Island service recently we suggest you do so. You will be glad you did.

Magnified a thousand times...
Sheffield Alloy Steel must show FAULTLESS QUALITY

This man at the microscope is one of a team of experts who guard the quality of Sheffield Alloy Steels from furnace charge to finished steel. Theirs is a far-reaching responsibility. For example, nowhere in all the wide range of Sheffield Alloy Steel uses is quality so important as in aircraft steels. Priceless human lives and a ship worth millions of dollars might be at stake if a tiny flaw went undetected.

That's why Sheffield aircraft quality steel is made only from the heart of the ingot. Through every step of Sheffield steelmaking, quality is constantly assured by the most advanced optical, chemical, electronic and mechanical quality controls and tests. Result: Sheffield Alloy Steels rigidly meet the demands of high strength for unquestionable safety; minimum weight for utmost efficiency.

There can be no compromise with quality for the big air transports and the mighty jets. Get this same standard of consistently high quality in Sheffield Alloy Steels tailored to your specific product demands.

Contact our Houston office for engineering counsel and cooperation.

TEXAS MARINE & INDUSTRIAL SUPPLIES

HOUSTON PORT BOOK, SPRING, 1956
Breeze through this summer in cotton. Crisp, lightweight cotton is naturally cooler. It lets air in, lets heat out ... absorbs perspiration quickly.

More than ever before, fashion designers are using cotton for every member of the family. No other fabric offers such variety of weaves and textures. No other fabric is so colorful, or so color-fast—from rainbow prints to soft pastels.

Modern research gives cotton fabrics new beauty and new usefulness. They can shed wrinkles, resist dirt, even take permanent pleating. They're casual or high fashion, to suit your mood.

For comfort . . . for style . . . for durability . . . wear cotton around the clock.

Working and growing with Texas

Our plant at Deer Park, Texas, is part and product of Texas on the move. With new chemical processes and Texas resources, this plant, among other things, has made available acrylate monomers in large quantities at lower cost — greatly expanding the application possibilities of these raw materials for plastics, paint and other protective coatings, synthetic rubber, finishes for paper, leather and textiles and pharmaceuticals.

We're glad we came to Texas . . . glad we're working with such fine people in such a great state. May we continue to work and grow together in the years ahead.
